PROFESSIONAL SUMMARY

Information Technology student and project-focused full-stack developer with hands-on experience building web and mobile applications through academic and independent projects. Works with Next.js, React, TypeScript, Tailwind CSS, Node.js, PHP, and relational databases, with a focus on practical workflows, responsive interfaces, API integration, and maintainable application structure.

EDUCATION

DAVAO DEL NORTE STATE COLLEGE | Panabo City, Davao del Norte
Bachelor of Science in Information Technology | Expected graduation: 2027

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS, Bootstrap, shadcn/ui
Backend & APIs: Node.js, Express.js, PHP, REST APIs, authentication and role-based access concepts
Database & ORM: MySQL, PostgreSQL, Prisma ORM, Neon,Supabase
Mobile & Maps: Flutter, React Native/Expo, Leaflet.js, geolocation and map integration
Tools & Deployment: Git, GitHub, VS Code, Vercel, Cloudinary

SELECTED PROJECTS

BlueWaste — GIS Waste Reporting & Coastal Cleanup Coordination
Academic capstone project | Next.js, Node.js/Express, PostgreSQL, Prisma, Flutter, Leaflet.js, Cloudinary

- Developing a platform for citizens to report coastal and marine waste with photos and location data, while LGU staff review reports and coordinate cleanup schedules.
- Designing role-based workflows, map-based report visualization, report status tracking, and a Flutter mobile client connected to the backend API.

FixFinder — Home Services Booking App
Mobile application | Flutter

- Building a service-booking experience for connecting users with technicians across home and device repair categories.
- Planning core screens and flows for browsing technicians, booking services, map-based tracking, chat, and user profiles.

MARIPHIL Foundation Website
Website project | Next.js

- Building a responsive informational website to present the foundation, its programs, and donation/contact information.
- Focusing on clear navigation, mobile-friendly layouts, and search-engine-friendly page structure.

Neil's Cellphone Repair Shop Management System
Management system project | Next.js and web technologies

- Planning a multi-branch management system for repair-shop operations, including branch-aware workflows and inventory-related needs.
- Designing a clean dashboard interface with a responsive layout and dark-mode support.

Jannlending — Website Project
Website project | Next.js and web technologies

- Developing a website experience with a focus on clear presentation, responsive layouts, and accessible navigation.
- Applying modern frontend practices to create a consistent user experience across desktop and mobile screens.

CES Travel & Tours — Travel Website
Website project | Next.js and web technologies

- Building a travel and tours website to present travel services and help prospective customers submit booking inquiries.
- Focusing on responsive navigation, clear service information, and a user-friendly inquiry experience.

ADDITIONAL PROJECT EXPERIENCE

Other concepts and projects include inventory and point-of-sale systems, car-rental workflows, and grower/farm management applications.

PROFESSIONAL INTERESTS

Full-stack web development, responsive UI/UX, API development, database-backed applications, and mobile app development.
